Wizardry: Labyrinth of Lost Souls is a Japanese role-playing game published and developed by Silicon Studio, Inc. The game was released for PlayStation Portable on September 12, 2009. Gameplay Growth Fruit is a new item added into the Japanese version of Wizardry: Labyrinth of Lost Souls. The item is used to grant the characters additional growth points and hit points. The growth points are given to every new character as soon as they register. Once a character has a certain number of growth points, it will grow, and the growth points will increase when the character performs actions, or when they eat certain special foods. The Hit Points given by Growth Fruit increase automatically when a character takes damage. It is also upgraded when the character levels up. Buxia will occasionally give the Growth Fruit to characters as a reward for completing the Story, Quest and Daily Quests. The Growth Fruit can be used up to five times. If the Growth Fruit is not used up to five times, the amount of points granted each time will be halved. This means that as the points are consumed, the value of each point will decrease and that the amount of points granted will be halved. This means the score will be based on your accumulated score before you consumed the item. If you play with other people in the same world, the scores may be slightly

different. The number of points granted at level ups is halved, too. If all the growth points are depleted, the character will no longer gain new hit points. The Growth Fruit can never be given to players who do not have the story unlocked, or who have not finished it. The game must be re-installed to unlock certain content, such as the Dragons and the battle arena. Purchasing the special items from the shop will not remove or affect the points. Normal point consuming quests The following quests will consume any remaining points. "Realistic Quest" - "Find Magical Power Vessels". "Perfect Quest" - "The King's Past" "Perfect Quest" - "The Witch of the Breakers's Past". Others This item can also be obtained from Normal Quests. However, the gain from normal quests is 1 point per every 50 points. The following quests will consume all growth points. "Pride Quest" - "The Pride of Ghoel" "Perfect Quest" - "Hands-Off!" "Hard

Hotaru is a difficult space style shoot 'em up with different waves of enemies, bosses and power-ups. The game has many choices, starting from two options. After you choose the color of your main ship, you can choose to be aggressive, go left, or go right. If you want to change your ship color, you can change the color of the one you have equipped in the ship menu. You have to press fire to shoot and jump to change directions. You have an unlimited supply of bullets to shoot enemies. If you hit them, you can use special power-ups. There are three different stages to complete, each stage with different enemies, bosses and power-ups. As you complete the stages, you get power-ups and save your progress at the end of each stage. After you complete the game, you can compete your best score to get the trophy. Controls Hotaru: The game has a colorful and fun main screen where you are able to read the information about

your progress and to play different levels. You can navigate through the levels by clicking on the different levels using the arrow keys. At the top you can choose the wave of enemies you are going to encounter, the color of your ship and the difficulty of the level. The power-ups and a direction you can press to shoot appear at the right of the levels. You can press Fire to shoot bullets or the up arrow key to shoot your missiles or the down arrow key to shoot your laser beams. TipsHotaru: Start the game by choosing your ship's color in the ship menu. After you finish the tutorial, the levels will appear. If you want to change the ship color, use the up and down arrow keys to move the ship between different levels. If you are having a hard time with the first level, you can replay the levels by pressing F6. You can also save your progress at the end of each level. If you complete a level, you will be able to access the next one. If you have killed all of the enemies on a level, you will be able to select the level you are going to encounter and you will be able to enter the next level. The mission and the obstacles are increasing as the game progress. Power-ups like special bullets, special powers, shields and laser beams are revealed as

What's new:

- What If Police Were Armed? Many cities and towns have armed police. Some are called SWAT (Special Weapons And Tactics) Teams. Others, such as Seattle, define themselves as Public Safety officers- carrying a gun, as well. In some countries, unarmed police officers have been shown to be vulnerable. This fearsome gun may be a deterrent to criminals when employed by PSOs who will not get the chance to pull it.

POLICE SHOOTING IN THE UNITED STATES COMPARED TO OTHER COUNTRIES According to a UC San Diego study, police killed 137 people in America during 2005. The study, also published in the National Research Council's journal, Conflict Matters, found that California had the most shoot-to-kill police interventions, with 53 officers shooting and killing 115 people that year. The federal government involved

itself in only three incidents in which police officers killed Americans, and the number may have been far higher if not for the violent crime that is commonplace in so many of our cities. Japan- 85 South Korea- 45 Germany- 44 Northern Ireland- 36 Sweden- 33 Australia- 32 Canada- 32 33-30 The United States- 32 22-21 5-4 Canada, Australia, and Sweden all have no less than five police officers per 1,000 citizens. Police in Germany and the UK do not carry guns, and although Germany has a huge army, their police work largely works within internal affairs. But according to the Los Angeles based John J. Friedman Group, " In 35 American States police were not required to carry weapons or get training in use of weapons during the 70s and 80s." MASS SHOOTINGS: 1996- Current In 1996, a young man named Timothy Wood fired into a crowd of shoppers in a Chicago suburb. He killed two women and critically injured four more. But when the would-be mass killer tried to turn the gun on himself, another Illinois police officer shot and killed him. In the past, police officers arrested potential mass shooters before they could pull the trigger but not in 2005. On the upper east side of New York City, a 26-year-old murderous psychopath with no prior history of violence fatally shot eight people in a twelve hour rampage through several Central Park blocks. He was stopped as a homicide suspect by well armed NYPD officers who transferred custody to Transit

In a seemingly ancient and forgotten continent lies the City of Locusts. This desolate wasteland of ash-covered stone buildings and overgrown trees holds a horror beyond comprehension. Generations of crusaders have come through the gates of the City and perished in its insatiable hunger. Those who have survived tell tales of portals to other worlds opening at the center of the city. The legend of the place is that if you survive your first twenty-four hours the city will keep you alive forever. The year is 2156, when apocalyptic cult of the Book of Strahd embraced the newfound power of ancient magic and gained control over the fabled City of Locusts. The cult unveiled their horrific plans to its followers and commanded them to breach the gates to the unknowable depths below the city. The cult once known as “The Foul Alliance” has returned to the City of Locusts and their leader, Deskari, demands that they make their final sacrifices for the sake of Azuth, the God of Magic. Beyond the walls of the City lies a portal that will lead the demoness Ghast and her minions into the Worldwound. Azuth's champions, the Pathfinder Crusade, must stand before the gates of the City and defeat its leader, but they will need allies. Desperate to restore order to the Worldwound, the Pathfinder Crusade may find allies in the deadly hunters who dwell in the distant regions of the

continent. The Foul Alliance is not the only threat within the City of Locusts. Shrines of the book of Strahd have spread across the continent, and the cultists offer those who join them everlasting life, power, and glory--provided that they slay the Book of Strahd's author, Richard Anthony B..
