How To Download ICX Payal App :Payal is an Indian mobile app to buy and download movies, games and pay for other online services online. Payal app is the digital version of our trusted Phone Pe prepaid paytm wallet.Use ICX to pay online and earn cashback or recharge your mobile. How to add Payal app to your Lock App, please follow the steps given below: 1.You will have to first add the Payal app to your Lock App profile (Tap the gear icon to open a menu) 2.Next,Tap on the Payal App Option to get a list of apps available. 3. Once you found the Payal option,you can click on to add it. Tip for using Payal App : You must have a valid ID proof on your mobile for Payal login. Your complete name, service provider, mobile number and ID proof can be found on your Payal App profile. Last update: This app would have removed/installed with version 11.2. (Update :- I updated to API v11.2 and the app was removed again. API v11.2 allows the app to remove/install apps without you prompt but only if you have the Install option checked for that app. Payal App has an inbuilt profile with all the predefined apps you can add to your Lock App profile. If you find the app you want to add is not available under Payal or any other similar app profile you can search for it on Play store or App store from you device and download it. You can then add it to your Lock App. All these apps

have inbuilt options to enable/disable updates, Pin it to start, Pin it to home, Remove it from lock app profile etc To remove an app from the lock screen, follow the steps given below. You can also preview an app and its update on the lock screen. To do this, tap the app name or the small update icon given in the app bar at the bottom. Apps like Paypal app will be easy to add and update as they are already saved in your paypal wallet. You can download Paypal app in the App store on your device Getting Started - Step 1: Unlock your phone (Settings - Security - Device administrator) Getting Started - Step 2: Add Paypal to Lock App Step 3: Add the Paypal App to your Lock App Profile Step 4: Add the relevant apps you want to pin Let's say you 0cc13bf012

Black Ops 2 Uprising.Q: Shows No Certified Credentials with C# I'm trying to check if a Server is Certified/Trusted. I'm using the WebRequest to call the URL and after that I'm calling the WebRequest to check if the Certification is Certified or not. But when I run the process, the Certification is listed as "No Certification" but it should be listed as Certified. I'm getting no errors, the WebClient is passing successfully. Here is my C# Code: var output = new System.Net.WebClient(); output.UseDefaultCredentials = true; var url = ""; var certList = output.GetCertificateStore(); var certs = new System.Net.Security.X509Certificates.X509Certificate2Collection(certList); foreach (var cert in certs) { Console.WriteLine(cert.Certification); if (cert.Certification != "Unrecognized") { Console.WriteLine(cert.Certification); Console.WriteLine("Certified"); } else { Console.WriteLine(cert.Certification); Console.WriteLine("No Certification"); } } Console.ReadKey(); A: The problem is
