Katharsis is based on the Greek myth of Oedipus. It is mainly following the story of Oedipus and the story of his blind mother. The main character is under a lot of mental pressure. He feels like a burden on his family. But what is the point of his life? This is the moment for an examination of yourself and a map of your life. Do you feel lost? Can you end your life on your own terms? Is the the only option to become a burden to others? Or to follow your dreams no matter what they may be? > Where should you go? > What should you do? A: I am not sure why you would need to start with an "obsession" as described by the question, but I do not find it unreasonable for a game to start with your character facing a huge dilemma. Oedipus's dilemma was about his mommy issues, not about not being able to find milk. A: Katharsis sounds like a very cool game. I like when games deal with philosophical, deep, thought provoking, questions. However, I feel that this title has a lot of problems. I'm not being negative here, I'm just being honest as a gamer. I get what you were going for, but it's not clear at all. I read this question on Twitter earlier and came away thinking: There is a huge comparison to make between this and Oedipus. Oedipus is a tragedy. Does the first thing you do in the game? What happens? The Greek myths are very, very controversial. A: Sounds interesting. It's got a lot of potential if it actually works. "A deadly question"... about "Why are we here?" and "what's the point of life?" and "what is the purpose of my life"... Sounds like it has an underlying theme of mortality and death. This can be very interesting. But it also appears to have an underlying theme of "taking over the world". Eg. Death. In that case, it has very little chance of being successful. I mean, because the concept isn't new or original. I think game designers with the same theme need to apply their creativity in finding different ways of presenting the same concept. Eg. Since "Why are we here?" is such a well-known question, you

The year is 2000, and a war has begun... Fallout 2 is an award-winning satirical action role-playing game, and takes place 30 years after the events of its immediate predecessor, Fallout. Set in the same post-apocalyptic future, it tells the story of Vault Dweller's struggles to survive in a world beyond recovery. As with the original, you take on the role of a randomly-generated character who survives a Vault disaster and begins life in the Capital Wasteland. The environment and equipment are significantly different in this sequel; the base of operations is a decommissioned military base, and many of the weapons used are of the 1950s-'70s period, like M1 Garands and Thompson sub-machine guns. The game is set in the same Earth of the original, with the same factions of the Brotherhood of Steel, NCR, and more. The game is also set in the same non-canon universe as Fallout 4. What's new? - A living, breathing post-apocalyptic world with an array of story-driven quests including the return of the Megatonnage weapons - Playable AI companions, including Dogmeat, Dogmeat's daughter Gladys and Ghoulies (nearly 30 different types of little monster - including 'atom drones'), and Leper Chaney's mule - Inherently moddable games, with a scripting language and the ability to create entirely new game content from existing assets - Weapons like "revolvers, sawed-off shotguns, a chaingun, laser rifles, and several melee weapons" What else is new? - A brand-new engine completely overhauls the game engine and makes the world and character models much more detailed and colorful - Art design by Todd McFarlane and a team of concept artists - A huge, expansive, open-world world with more than 50 major towns - Over 200 hours of gameplay - New, character-building morality and decision-making systems - An improved AI and NPCs with more personality - Numerous overhauled quests, side-quests, and more - Voice acting by the fabulous actors behind Fallout 3 and New Vegas: Jim Meskimen, Jennifer Hale, Brian Bloom, Roger Wayne, & Nick Nolan (That's Jack Noland and Brian Bloom not Nick Nolan. They're the two voices behind Jigsaw and Caesar) - More locations than in any other Fallout game, like the Mystery Shrine, the Moon Pool, even the
